kuraray

We at K3nko, an in-house start-up of Kuraray Europe GmbH, aim to use 3D printing technologies for the development of future products and solutions. Our current project involves a new generation of prostheses for the orthopedic market to simplify manufacturing and increase comfort.

At K3nko we are always looking for young, motivated people who are interested in working in an agile, self-organized team on the topics of the future, so we are currently looking for a

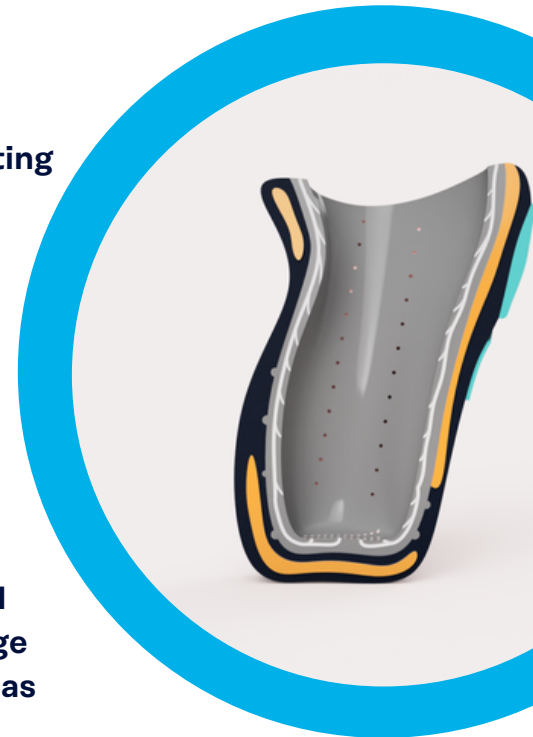

Working student (m/f/d) for our 3D printing project "K3nko"

What THE JOB BRINGS

- Developing and manufacturing new products using 3D printing technologies
- Conducting market studies and market analysis
- Experimental testing of Kuraray products in the field of 3D printing
- Creation and editing of digital models
- Explorative team collaboration

What YOU BRING

- Bachelor's or Master's study in a scientific or technical field
- Fluent communication skills in German and English language
- Confident use of MS Office, knowledge of CAD/CAM (such as Meshmixer, Blender, or similar)
- Open, curious and innovative mindset, start-up experience preferred
- Previous knowledge in the field of 3D printing and medical technology
- Open-mindedness towards new application fields and open for challenges
- Ability to work in a team and independently

You have questions- contact Iliana Lontou at +49 69 305 85722
We are looking forward to your application!
